

SUNGUARD® SUPERNEUTRAL SN 70/35

High Selective solar protection on neutral looking glass

Architects and owners regularly choose coated glass products that offer very high natural light transmission while ensuring energy savings and solar protection. SunGuard® SN 70/35 meets these requirements. This multifunctional coating minimises the need for artificial light and offers excellent solar protection combined with outstanding thermal insulation.

- **Excellent selectivity: combining high solar protection with a high light transmission**
- **Attractive neutral blue reflected color with available matching spandrel**
- **Ideal for fully glazed façade and large framed windows**
- **Available on laminated and acoustic laminated glass for more security and comfort**
- **Heat-treatable (HT) and annealed glass with matching appearance**

Visible light				Solar energy			Solar factor (g)	Selec- tivity	U-value (EN 673)
Trans- mission [%]	Reflection outside [%]	Reflection inside [%]	Colour rendering index	Direct transmission [%]	Reflection outside [%]	Absorption [%]	EN 410 [%]		Argon 90% [W/m²K]
Double-glazing: 6-16-4, SunGuard® SuperNeutral on surface #2									
70	14	16	94	33	42	25	35	2.00	1.0
Triple-glazing: 6-16-4-16-4, SunGuard® SuperNeutral on surface #2 + ClimaGuard® Premium2 on surface #5									
64	16	18	94	29	43	28	32	2.00	0.5

The performance values shown are nominal and subject to variations due to manufacturing tolerances. Spectra-photometric values according to EN 410; U-values according to EN 673.

BUILD WITH LIGHT®

SunGuard® Products are available at several locations situated throughout Europe from GUARDIANs independent network of Processors. Please contact your local GUARDIAN representative for further information.
